

SAGOLA

an Elcometer company

**INDUSTRIAL PAINTING
PROFESSIONAL EQUIPMENT**

SAGOLA can trace its origins to the year 1955 and is fruit of the pioneering spirit of its founder, Alejandro Sánchez Larrauri.

It began as a small subcontracting workshop for industry. After some years in the subcontracting sector, Larrauri felt the need to manufacture his own product and progressively withdraw from subcontracted activity.

The chosen product was the spray gun. This new era for SAGOLA was crowned by the manufacture and sale of the mythical ALM 401 spray gun. From that very moment SAGOLA began to make and distribute a large number of spray gun models and other complements used in the coatings sector such as air filters, pressure pots, and an endless list of equipment for the most varied applications.

Due once again to the entrepreneurial spirit of the SAGOLA team, the need was felt to open the company to the international market. For that reason the Company began operating in related markets such as Latin America, where it soon became the indisputable leader, later expanding to Arab countries, Asia and finally Europe. Today, SAGOLA is present in more than 80 countries worldwide.

SAGOLA has maintained the highest quality standards in the manufacture of its products from its very beginnings, which has contributed to become a very important competitor in sectors such as bodyshop and industry.

In 2020, SAGOLA has become part of a much larger company. The ELCOMETER Group. Headquartered in the UK, Elcometer is also a family business and has been owned by the Sellars family for seven generations. Beginning in the 19th century as a chemical company, Elcometer, headquartered in Manchester, UK, has grown into one of the world's leaders in the design, manufacture and supply of equipment for the coating and non-destructive testing industries (END).

Elcometer exports more than 90% of the products it manufactures through its offices in France, Germany, Japan, the Netherlands, Singapore, the United Arab Emirates and the USA and its global distribution network that covers more than 170 countries throughout the world.

Like Sagola, the philosophy of the Elcometer company is to integrate quality into all aspects of the products they design and manufacture, while being very aware of the environment that surrounds us. Elcometer's commitment is reflected in its ISO 9001 and 14001 Quality and Environmental accreditations.

Company

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

SAGOLA began 65 years ago as a small subcontracting workshop with three workers. A strong desire to develop our own product and brand led SAGOLA to begin the manufacture of spray painting equipment.

Development and Innovation

Since our beginnings, SAGOLA has always maintained the highest quality standards in its products and production processes, facilitating the most demanding coating processes.

SAGOLA began 66 years ago as a small subcontracting workshop with three workers. A strong desire to develop our own product and brand led SAGOLA to begin the manufacture of spray painting equipment.

- > Achieve the best technical conditions in order to offer the highest quality in the finished product,
- > and at the same time present innovation in our most demanding markets, such as the bodyshop and industrial sectors,...

All of this has made SAGOLA what it is today, a company and a brand recognised not only in the domestic market, but in more than 80 countries worldwide.

**We have 65 years of experience
as manufacturer of spray guns
and spraying equipment**

After 65 years making and developing new products, we are convinced of the need to establish a close relation with our clients on a day-to-day basis.

We know that the best product is based on the proper development of what is demanded by the market at each moment in time. For that reason we constantly reinforce our training and sales and marketing personnel, which is in permanent contact with the market and its needs all over the world.

The quality of our products is acknowledged in more than eighty countries. SAGOLA has a vast experience and owns know-how in the manufacture of professional coating systems.

Human Resources

After many years of work SAGOLA can call upon an extensive team of experts who believe in quality and innovation. These two factors are and will continue to be the pillars on which our brand is built.

**Strengthening our human resources
is SAGOLA's principal objective**

SAGOLA is a worldwide benchmark brand thanks to the highly qualified professionals in our team. Notwithstanding, this team continues to work towards the objective of consolidating the SAGOLA brand as the industry yardstick.

**The high level of technology
in our production methods guarantees
the highest product quality standards**

The fusion of manufacturing, production means and manufacturing processes technologies with a highly qualified workforce has characterized SAGOLA from the very beginning.

R+D+i

Our commitment to R+D+i is absolutely clear. We devote all our efforts in this department to assuring that our products are adapted to the needs of the market.

Our objective is that between both parties and the innovations generated at our headquarters, clients will regard SAGOLA as a safe bet and stay loyal to a brand which researches on a day-to-day basis to develop products which answer their needs.

Optimisation and Self-improvement and service

When it comes to service we are talking about a deeply rooted culture arising from the history of SAGOLA, to which service is vital.

The robotic automation of all our warehouses is an example, a major investment which gives us an advantage over the competition when it comes to offering a fast, reliable response which the market appreciates.

La Calidad como marca

If the SAGOLA brand plays an important role on the market after 66 years of history, this is due to the emphasis placed on QUALITY.

At our factory in Vitoria (Spain), each department you visit is steeped in an atmosphere of quality.

At the beginning the founder, Alejandro Sánchez, was able to transmit this vital concept and 66 years later his heritage on this point remains as vital as on the first day.

Warranty

SAGOLA provides a 3-year guarantee with the main products.

We know this is the best way of showing our customers that we believe in our products and that our guarantee will make our past and present customers loyal in the future

From its very beginnings SAGOLA has showed marked interest in advances related to care of and respect for the environment

Since the very first developments regarding VOC emissions to the atmosphere, SAGOLA wanted to be a cutting-edge company by implementing new environmental regulations and systems for its products.

With the inclusion of EPA and HVLP systems, as well as progress made in the field of filtration and others, we believe that we can contribute on a daily basis through new developments in our innovation policy.

Our commercial office and training team are amongst the pillars of the SAGOLA BRAND worldwide

Our training team and the entire company believes that there is an important difference between being merely a quality manufacturer and being a manufacturer which develops and trains workgroups for the various sectors in which we are present.

We believe that the products we make always need a solid sales support. Our commercial partners all over the world appreciate our assistance in setting up their sales networks and technical teams.

Thanks to the efforts of both, we embark upon each new financial year resting on a solid base suitable for the construction of a long-term project. Courses are available both at our Vitoria headquarters and on site.

This department is aware that our sales effort requires its support when responding to particular dilemmas, problems or needs related to specific queries we are constantly receiving from all over the world. These are transmitted rapidly to qualified experts who provide immediate data and solutions.

The sectors in which we have traditionally had a presence, have always considered us a leading brand, but to stay that way all the players in each sector demand that our developments take account of the changes taking place in each field. We therefore have different product lines for each segment in accordance with its needs.

Bodyshop

This is the sector most often identified with SAGOLA, and in many ways the sector which sets the standard for all the others as far as paints and performance are concerned.

Apart from our list of annexes, for this sector we detail our star products in quality and sales volume.

Industrial Vehicle

This sector recognises in SAGOLA an established manufacturer of coating spray guns and equipment. The brand is closely associated with reliability, quality and convenience at work, contributing confidence to the commercial vehicle distribution network.

Industrial Supplies

This is a constantly developing sector in which SAGOLA has always been the reference, with special finishes, equipment, for pressure and special pumps for products specifically developed for this sector.

**The loyalty of our users is one of our closest allies,
in conjunction with innovation**

Our business partners are aware that SAGOLA, as well as contributing a quality brand, provides them with a manufacturer who has won their loyalty by dint of constant effort over the years. This is something we strive for every day.

We are aware that our development and innovation will be our best allies along with the loyalty of our users in the future.

**SAGOLA has always been export-oriented and has
achieved a notable expansion**

We have always had an export-oriented attitude. We are currently present in more than 80 countries and keep on growing to ensure that our brand, and the products it represents, reach the entire world with the invaluable help and support of our importers.

More than 60 industrial patents/models registered worldwide CEE / ASIA / USA:

- Manual spray guns
- Automatic spray guns
- Packing nuts
- Blowguns
- Aircaps
- Valves
- Deposits
- Keys, Accessories

On the other hand the commitment to uphold the highest standards of security makes the manufacture of our products to evolution continuously in its design and manufacturing process. Therefore our standard products meet CE, ATEX, IP54, etc.

SAGOLA is a company which spends significant resources in R-D and is always in constant evolution. As result of this investigation and due to the need of protection of our own Know-how, SAGOLA is very active in all related with the intellectual property, being owner of a large number of patents worldwide.

Undoubtedly, SAGOLA is a recognized brand worldwide so in this aspect, the protection levels of our brand worldwide are very high. SAGOLA has got registered its different brands (SAGOLA, DEFYNIK and DELON) practically worldwide.

As a reference it is worth noting that SAGOLA was one of the first companies in Spain to obtain ISO certification, which meant a new management model where improvisation was forgotten and gave way to a management organization fully controlled and automated.

The commitment to the environment by SAGOLA has always been one of its main objectives. This is the reason why SAGOLA has been a pioneer in the manufacture of equipment for low-emission paint solvent to the atmosphere. We were pioneers in meeting environmental regulations as strict as the 1151 of the US California State SCAQMD.

Our relationship with painting manufacturers around the world means that launching SAGOLA in a new market is easier for us.

Our homologations make the market more active because users know that the product they are buying has been tested and homologated by their paint brand.

For many years, SAGOLA has devoted all its efforts not only on improving the quality of its products and service, but also to improve all aspects related with management, HR, environment, etc.

Industrial and Construction Pumps

Wide range of equipment for painting:

- > **Low Pressure Pumps** for spray guns.
- > **Airless Pumps** for airless spray gun operation.
 - > **Mix Pumps**
- > **Fluid supply of Liquids;** paints, solvents, oils...

Adapted to all industrial sector needs for spray painting:

- > **Mid to high continuous production** by automatic machinery and paint robots.
- > **Metal, wood, tannery, plastics, vehicles and industrial machinery sectors.**

Maximum resistance to all types of solvents and designed for the new waterborne paints and clearcoats.

The range of industrial pumps offered by SAGOLA adheres to our most demanding principles of quality in the materials employed and precision machining to produce technologically functional and robust pumps suitable for all types of paint.

INDUSTRIAL PAINTING
Industrial pumps
 Low pressure
 Pneumatics

DM 1/400

DM
1/400

High production

Several spray guns

Low pressure painting equipment

Twin Double Membrane Pump.

Painting equipment for high productions. It has been designed and manufactured focusing on the needs of several trades: from small metal, plastic and wood-working factories to the highest level industrial bodyshops.

It can be used with several spray guns at once.

Easy-to-use and low air-consumption combined with the highest performance.

Low maintenance cost.

There is a special version for abrasives.

Clearcoats, dyes, clears, ceramics, basecoats and glues. Basecoats, primers and, in general, medium viscosity products.

ATEX  II 2G x

***Full equipment (standard),** includes DM 1/400 (Trolley and absorption), 4100 X Series Pressure 1.20 [XT01 B] and 5 m. air and product hose (Ø 6mm. inside).

TECHNICAL DETAILS

- > Pressure ratio 1 : 1
- > Free flow: 40 L/min.
- > Product output pressure: max. 7 bar.
- > Air inlet pressure: max. 7 bar.
- > Air consumption: 580 L/min.
- > Weight: 18 kg.
- > Air inlet: BSP 1/4"
- > Product outlet: BSP 3/8"

Forged and anodized aluminum body of great robustness and high corrosion protection

High strength and durability anodized aluminum air nozzles (corrosion free). Ideal for aggressive environments

High profitability in continuous painting. Time and tiredness saving

High durability self-adjusting gland

Capable to work with high paint flows

Maximum speed, productivity and ease of application

Air-paint single shaft

Sagola presents its new **X 4100 Series**, especially for the industrial painting sector. We maintain all the quality standards of its predecessor the 4100 and incorporate new aspects. All this makes it the perfect tool for work with very high demands in terms of quality of finish, robustness and ergonomics for continuous work.

Reduction of its dimensions to the maximum, thus improving the manageability and consequently the accessibility to the painting of parts with complex surfaces.

Adaptability perfect at hand, reducing the feeling of fatigue on continued work due to weight reduction and improvement in their support points.

It incorporates the air valve **SOFT FLOW**, higher precision and smoothness, even with high air pressure.

Application possibility for all kind of paints and sprayable products: dyes, metals, glazes, varnishes, basecoats, primers, glues, adhesives, abrasive products, ceramics, forge effect (special T.C.), textured, etc.

Trigger and shaft 100% made of stainless steel (Ultra-ergonomic design)

Reinforced stainless steel spool. Very high resistance against mechanical abrasion.

Minimum maintenance

ATEX II 2G x

SAGOLA introduces its new range of professional line RAIDER 300 MIXED version.

This line, exclusively designed and manufactured for professional use, gathers high standards both in term of performance and image.

Within the quality standards we focus on simplicity and durability.

Thus, we have redesigned completely the hydraulics. Now it contributes to a long-lasting life even in the worst working conditions and without waiving on its performance.

Code	Version
30951602	Trolley and absorption
30951603	Trolley and deposit
30951604	Wall and deposit
30951605	Wall and absorption
30951698	*Full equipment

TECHNICAL DETAILS

- > Pressure ratio: 30:1
- > Product inlet: Ø 12 x 21 mm.
- > Product outlet: BSP 1/4"
- > Free flow (60 cycles): 1.8 L/min
- > Product output pressure: max.: 200 bar
- > Air inlet pressure max.: 7 bar
- > Max. air consumption: 370 L/min
- > Tip max: 0.013"
- > Weight: 15.5 kg

Applications

Ideal for clearcoats, waterborne products, lacques, fonds, enamels and light primers.

The mixed version raider range has been designed and manufactured focusing on the needs of medium metal and wood-working factories.

Mack 150 Mix and Mack 320 Mix

MACK 150mix

High Production

ATEX  II 2G x

Mack 150 mix
(Trolley and deposit
version)

Mix pump. Ideal for finishes in high production, easy to use and very robust.

Reduced maintenance and self-adjusting packing system.

Clearcoats and waterborne paints, lacquers, basecoats and primers, enamels and antioxidants.

Code	Version
30931901	Trolley and absorption
30931902	Trolley and deposit
30931903	Wall and absorption
30931904	Wall and deposit
30931999	*Full equipment

TECHNICAL DETAILS

- > Pressure ratio: 15:1
- > Free flow (60 cycles): 2.7 L/min
- > Product output pressure: max.: 91 bar
- > Air inlet pressure max.: 7 bar
- > Air consumption: 245 L/min
- > Tip max: 0.018"
- > Weight: 20 kg

***Full equipment (standard),**
 includes Mack 150 mix (Trolley and absorption), Mini Xtreme Mix, 5 m. product and air hoses.

More information and application guides on page 82-83

MACK 320mix

High Production

ATEX  II 2G x

Pneumatic mix pump for high speed and production. Easy to use and high robust. Reduced maintenance and self-adjusting packing system.

Clearcoats and waterbase products, lacquers, fillers, primers and anti-oxidant products.

HTV 250 and HT 10/15/25

Sagola new professional range of vertical bellows pumps; HTV 250 mixed version.

Designed and manufactured for professional use, the HTV 250 offers excellent performance both in terms of features and design. The hydraulic components were redesigned for highest level of quality focused on technology and durability.

Thus, we have redesigned completely the hydraulics. Now it contributes to a long-lasting life even in the worst working conditions and without waiving on its performance. The bellows system provides long-lasting durability with minimum maintenance even for highly demanding materials.

TECHNICAL DETAILS

- > Pressure ratio: 25:1
- > Free flow (60 cycles): 2.8 L/min
- > Product output pressure max.: 175 bar
- > Air inlet pressure max.: 7 bar
- > Air consumption: 448 L/min
- > Maximum Tip: 0.018"
- > Weight: 30 kg

HT 10/15/25

Pneumatic mix pump ideal for automatic installations. High flow bellows pump without pressure drops. With its oversized design offers a very long life and minimum maintenance. Suitable for several manual spray guns.

Lacquers, fillers, primers, enamels, clearcoats, ultraviolet and polycyclic. Generally, medium viscosity products.

TECHNICAL DETAILS

	HT10	HT15	HT25
> Pressure ratio:	10:1	15:1	25:1
> Free flow:	9.75 L/min	9.75 L/min	9.75 L/min
> Air consumption:	646 L/min	800 L/min	1,326 L/min
> Product output pressure max.:	60 bar	90 bar	150 bar
> Air inlet pressure max.:	6 bar	6 bar	6 bar
> Weight:	41 kg	42 kg	48 kg

***Full equipment (standard),** includes HT10/15/25 (trolley and absorption), Mini Xtreme Mix and 5 m. product and air hoses.

Recommended spray guns: V7, 4041 Mix and Xtreme Mix

Mini Xtreme Mix

Fluid filter housing
 guarantying coating quality

Swivel coupling
 avoiding tension in the fluid hose

Mini
XTREME MIX

High resistance and anodized forged aluminium body

Nozzle and Needle fittings made of Tungsten carbide

Smooth action trigger 100% Stainless steel

Exterior and interior corrosive protection

Ideal for complex jobs

Maximum ergonomics

ATEX  II 2G x

SAGOLA presents its new spray gun where is the result of a great design work, obtaining one of the smaller and ergonomics mixed gun on the market. Ideal for painting parts with complex shapes.

A perfect fusion between speed and high transfer with quality finishes of XTREME aerographic systems.

Full control in the regulation of fan, maximum precision.

Ideal for waterborne products. Designed for UV and waterborne paints. Ideal for furniture sector, industry and industrial bodyshop.

XTREME technology nozzles

METAL TO METAL technology, free of joints

Progressive air valve
 Better control and precision

Tool-less needle disassembling system

Fan regulator
 High precision

Security system
 Trigger block

> Recommended maximum nozzle:	0.032"	0.032"
> Maximum nozzle 2 guns:	0.018"	0.018"

TECHNICAL ADVANTAGES / Airless and Mix Equipments

- 1 PNEUMATIC BODY ANODIZED FORGED ALUMINIUM.** High resistant to corrosion.
- 2 OVERSIZED PNEUMATIC CONTROL AREA.** To avoid freezing problems and maintain a smooth operation without any loss of performance.
- 3 PNEUMATIC AREA SHAFT GROUND AND CHROMIUM-PLATED.**
- 4 PRODUCT AREA SHAFTS TEMPERED AND CHROMIUM-PLATED.** Great durability and wearing resistance.
- 5 ALL PACKINGS HAVE BEEN REDESIGNED.** They offer great durability and smooth-functioning, even working at low pressure.
- 6 NEW OVERSIZED VALVES.** They provide a better product flow, a lower product flow-speed and therefore, a lower wear.
- 7 COMPACT DESIGN, STURDY and HIGH QUALITY.**
- 8 SIMPLIFIED DESIGN.** Now there are less parts, so it is easier to maintain and repair.
- 9 ANTI-PULSATION SYSTEM standard for all models.**
- REGULATORS:** AIRLESS Equipment, Pump pressure regulation system, MIX Equipment, pump and atomization regulation system.

- ④ **PLUGS MADE OF DURALUMINIUM.**
- ⑤ **POLYAMIDE MEMBRANE**
Resistant to wear and solvent.

PSAM 107, PSAM 104 and Pole

**PSAM
107**

For professional use

Extremely robust and durable

Pressure: up to 450 bar

All the advantages of the airless system: speed, high thickness, minimum overspray

Code	Application
30170101	To use with all types of low, medium and high viscosity products.

Does not include swivel head and nozzle

* Recommended airless swivelling HEAD and AIRCAPS (see page 28)

The PSAM 107 is a high pressure airless spray gun. It is a gun for professional use with an anodised aluminium body and comfortable action due to its four-finger trigger.

It is recommended for using with all types of low, medium and high viscosity products.

Both seats and closures are manufactured in tungsten carbide. It incorporates a 1/4-inch revolving coupling and filter holder.

TECHNICAL DETAILS

- > Working pressure: 450 bar
- > Weight: 575 g
- > Screw nozzle: 11/16"

**PSAM
104**

For professional use

Code	Application
30170103	To use with all types of low and medium viscosity products.

Does not include swivel head and nozzle

* Recommended airless swivelling HEAD and AIRCAPS (see page 28)

High pressure spray gun recommended for pneumatic and electric airless systems not exceeding a working pressure of 250 bar. It is recommended for all types of medium viscosity products. Both seats and closures are manufactured in tungsten carbide. It incorporates a 1/4-inch revolving "M" coupling and filter holder.

TECHNICAL DETAILS

- > Max. Working pressure: 260 bar
- > Maximum working temperature: 80°C
- > Screw nozzle: 11/16"

Pole spray gun

For professional use

Code	Version
30170105	Pole spray gun
30990381	Pole + roller extension set

Length with roller: 915 mm.

Code
30990368

Airless gun available with die-pressed anodised body. Treated-steel trigger for operation with four fingers and with safety locking system. Both seats and closures are manufactured in tungsten carbide. It incorporates a 1/4-inch revolving "M" coupling. Application of plastic paints with a roller extension.

TECHNICAL DETAILS

- > Max. Working pressure: 220 bar
- > Swivel coupling: 1/4"
- > Weight: 470 g.

Industrial turbines

TURBO3000
PRO

High performance

Maximum quality

Very wide fan patterns

Nozzle and needle in stainless steel

3-stage turbine

Code	Version
30640201	Complet equipment 220 V / 50 Hz

Turbo 3000 Pro and Turbo 2200 Pro

Professional HVLP autonomous tool. High performance.

Minimum mist.

Autonomous Turbine Equipment for the application of dyes, lacquers, enamels, clearcoats, primers, textured products and cast iron effect.

Ideal for painting and assemblies works.

Metallic spray gun with fan and product regulators. Deposit with anti-return valve, flange closure and anti-drip lid.

Includes double removable air filter.

Code	Description
56418597	Turbo 3300 PRO Turbine air filters kit (6 units)

TECHNICAL DETAILS

- > Electric motor: Direct Current
- > Power: 1,400 w
- > Motor consumption: 6.1 Amp.
- > Free flow: 2,500 L/min
- > Maximum working pressure: 0.3 bar
- > Hose length: 8 m.
- > Weight: 12 kg
- > Transfer: 75%

Combinations SAGOLA 455 Spray Gun

Code	Version	Application

10110506	2.00 [80]	Textured products, cast iron effect

Air regulator in turbine hose

TURBO
2200PRO

Very wide fan patterns

Stainless steel nozzle and needle

3-stage turbine

TECHNICAL DETAILS

- > Electric motor: 220 V - 50 Hz
- > Power: 1,300 w
- > Free flow: 2,000 L/min.
- > Maximum working pressure: 0.3 bar
- > Weight: 10 kg
- > Transfer: 75%

Autonomous Turbine Equipment for all type of industry, with a power of 1,300 w.

Excellent atomization. Ideal for painting and assemblies works.

Metallic spray gun with fan and product regulator. Deposit with anti-return valve, flange closure and anti-drip lid.

Hose length 6 meter
Removable double air filter.

Code	Version
30640401	Complet equipment 220 V / 50 Hz

Code	Version
56418663	Turbo 2200 PRO Turbine air filters kit (6 units)

Industrial pressure pots

SAGOLA pressure pots come into their own when pumping equipment demands the maximum durability and minimum maintenance, even with the most abrasive paints (ceramic and vitro-ceramic clears, cast iron effect, pastes...) or corrosive products (dyes, waterborne paints, waterborne adhesives...).

- > Manufactured in stainless steel.
- > Produced according to the most demanding international standards.
- > Extreme manufacturing quality and precision.
 - > Maximum safety.

Industrial pressure pots
Upper outlet pots

6110 INOX

Made of stainless steel
10 L. capacity

Double, high precision, robust regulator with anti-return valve

Code	Version
52411607	10 L. stainless steel interchangeable tank

6110 INOX Co

Special for adhesives

Recommended for SAGOLA adhesive guns

10 L capacity

Code

10550202

6110 Inox and 6110 Inox Co pressure pots

Offers the maximum durability due to the stainless steel body and lid.

Double, high precision, robust regulators with anti-return valve.

Valid for waterborne and solvent-based paints.

6110 homologation:

- > SPAIN: AP 1070 FBZ 2330
- > FRANCE: CODAP
- > GREAT BRITAIN: British Standard 1101-1977
- > GERMANY: A.D. Merkblätter
- > ATEX II 2G x

TECHNICAL DETAILS

- > Hand mixer
- > Optional interchangeable stainless steel deposit
- > Maximum inlet pressure: 4 bar
- > Air inlet: 1/4" BSP
- > Product outlet: 3/8" BSP
- > Product pressure gauge: 0 - 4 bar
- > Air pressure gauge: 0 - 8 bar

Code	Version
10540702	6110 Inox pressure pot
10540799	*Full equipment

The 6110 has a special version for bead application of adhesives which differs from its predecessor in the greater pressure it can handle (up to 7 bar), in addition to the absence of the agitator and the single regulator.

6110 homologation:

- > SPAIN: AP 1070 FBZ 2330
- > FRANCE: CODAP
- > GREAT BRITAIN: British Standard 1101-1977
- > GERMANY: A.D. Merkblätter
- > ATEX II 2G x

Certificate No.: FBC - 9168

TECHNICAL DETAILS

- > Maximum working pressure: 7 bar
- > Air inlet: 1/4" BSP
- > Product outlet: 3/8" BSP
- > Product pressure gauge: 0 - 8 bar

The full equipment includes: 6110 INOX pressure pot, air + product hose (5 m.) and X 4100 series pressure spray gun.

610, 612 pressure pots and hoses

610
 Pressure pot

Code	Version
40000273	610 pressure pot
10540798	*Full equipment

***Full equipment:** includes 610 pressure pot, air and product hoses (5 m.) and 3300 GTO pressure 1.40 [EPA].

Steel body and aluminium lid.
 Top outlet. Valid for solvent-based paints.
 Low and medium viscosity paints.
 > ATEX  II 2G x

TECHNICAL DETAILS

- > 10 liters capacity
- > Without product agitator
- > Double regulation
- > Valid for solvent-based paints
- > Working pressure: max. 4 bar
- > Product outlet: 3/8"
- > Air inlet: 1/4"

612

Easy to use
 Robust

Minimum maintenance

Ideal for Industrial bodyshop

Code	Version
10540801	612 pressure pot
10540899	*Full equipment

Air + product hose Kit. 1.8 m.

Code
56414128

Pressure pot. Aluminum body and lid.
 2.5 litres deposit capacity.
 Top outlet and pressure regulator.
 Valid for waterborne and solvent-based paints.
 > ATEX  II 2G x

TECHNICAL DETAILS

- > Pressure ratio 1 : 1
- > Deposit capacity: 2.5 L
- > Working pressure: max.: 3.3 bar
- > Air inlet: 1/4"
- > Product outlet: 3/8"

***The full equipment** includes: 612 pressure pot, X 4100 series Pressure 1.20 [XT01 B] and 1.8 m. air and product hoses.

Aerographic spray guns

SAGOLA aims to provide **the best response to industrial painting needs** with this range of spray guns.

- > Maximum productivity
- > Improved productivity of the painting line
- > Time and product savings
- > Minimization of mist and solvent emissions
- > Cost reductions related to equipment maintenance
- > Achieving the maximum finishing quality standards

SAGOLA offers all its experience in finishing to supply industrial painting sectors with **highly competitive tools and equipment** for the following sectors:

- > **Wood, metal, plastic, industrial vehicle and automotive production lines, industrial machinery, maritime, ceramics, tannery finishes...**

Our daily commitment: to respond to the new challenges in paints and coatings for industrial surfaces.

- > Finishes with the maximum gloss requirements
- > High-solid paints and clearcoats and waterborne finishes
- > Dyes and metallized products
- > Paints, ceramics and abrasive and corrosive products

With the aim of meeting these objectives we offer **high transfer spray guns** which meet the most demanding solvent emission regulations and standards:

- > **HVLP** and **EPA, Mix, Airless** spray guns...

INDUSTRIAL PAINTING

 Suction
 spray guns

X 4100 series Suction

X4100
SERIES

Forged aluminium body
 High quality chromed finish

Nozzle and needle
 on a single stainless steel part

Aluminium high capacity deposit (1L)
 Double watertight gasket system
 Clamp gasket and anti-drip lid

Maximum use of paint level

Forged and anodized aluminum body of great robustness and high corrosion protection

Ideal for painting large areas, machinery and industrial vehicles

Extra deposit capacity and application speed

Ideal for continuous work sessions and large surfaces

More comfortable painting and less tiredness due to the low gravity center

Suction system of our 4100 allows painting at right angles with the piece when painting bonnets, roofs, vehicles' inside parts, trucks' chassis, trailers, etc.

TECHNICAL DETAILS

- > Weight with deposit: 920 g
- > Dimensions with deposit: 29.6 x 18.3 x 10.5 cm
- > Air inlet couplings BSP 1/4" male
- > Design pressure: 8 bar
- > Maximum recommended inlet pressure (working pressure): 2 - 2.5 bar
- > Recommended application distance: 18 - 22 cm
- > Max. paint flow output (nozzle 1.4 mm. 20"):
 Aircap 96: 168 g/min

Automatic spray guns

- > **Customised solutions** for each product and spraying process.
- > Maximum **productivity**
- > Optimum **performance**
 - > Minimum mist.
 - > Easy to clean.
- > Maximum **toughness**.
- > **Minimum maintenance**.

These are the basic premises upon which all SAGOLA automatic spray guns are designed.

INDUSTRIAL PAINTING

Automatic spray guns

V Series Introduction

New range of automatic spray guns

Totally accurate regulation

New mounting and guidance systems

Significant advantages

The new V series of spray guns incorporates a new system of regulation allowing the achievement of better finishes and higher performance in any kind of application employing any kind of product.

The new V range of automatic spray guns has been designed and manufactured to carry out the very highest quality tasks. This new family of tools aims to cover a wide variety of product applications, including corrosive and abrasive products.

It is designed to work with both waterborne and solvent-based products. Its construction is characterised by the remarkably small number of parts that need maintenance, which makes it extremely reliable, keeping downtime to a minimum.

Versions

The new range embraces all known spray production systems: MEDIUM PRESSURE, HVLP, EPA and MIX.

Each one is available in multiple versions: special for corrosive products, abrasive products, special for robots, etc.

In a word, this new range of spray guns will cover all future production line painting needs.

**INNOVATION + TECHNOLOGY + PERFORMANCE =
MAXIMUM PRODUCTION + MINIMUM MAINTENANCE**

Automatic paint packing gland without gaskets that require handling

Made of stainless steel.

Nozzle and Needle

Made of stainless steel.
Optional Carbide.

Circulating paint outlet

Detachable paint-head

and independent from the pneumatic zone, with four leak detection holes between them, covering all possible angles. 100% stainless steel option.

Paint flow regulator

with integrated adjustable micrometer for a precise and homogeneous paint regulation of all the guns in the line.

Air inlets for atomization and operation

Fan regulator

This regulator allows us to adjust the size of the fan (of the atomisation air).

New mooring and guidance systems

This new system allows removal and replacement of the spray gun from its workstation, keeping always with the same orientation.

Waste time spent adjusting spray guns at their workstations is eliminated completely.

Fan control regulator

This regulator controls the quantity and distribution of air between the lugs and central holes, allowing a perfect distribution of the spray pattern independently of the viscosity of the product.

V4 & V5 HVLP V Series

V4

V4

High production conventional spray gun. Incorporates double fan regulator and product regulator.

In the standard version, the nozzle and the needle are made of stainless steel.

Maximum speed of application

Allows working with high paint flows

Stainless steel head versions for corrosive products and tungsten carbide nozzles for abrasives

* See CODES on page 52

Applications

- > For tasks requiring a high opening and closure rate. Ideal to be used with robots and special machinery.
- > Versions for highly corrosive or abrasive products (with tungsten carbide needle and nozzle).
- > Special for high speed and top quality finishes.

Application Sectors

Metal Industry - Plastic Industry - Automotive Industry - Ceramics

TECHNICAL DETAILS

- > Dimensions: 164 x 45 x 104 mm
- > Weight: 785 g
- > Air consumption: 350 - 400 L/min
- > ATEX II 2G x

Standard version

V5

V5 HVLP

Maximum reduction in product consumption and mist

High speed application

Stainless steel head versions for corrosive products and tungsten carbide nozzles for abrasives

* See CODES on page 52

This is the ideal tool where very high application speed along with significant reduction of product consumption are required. Spray mist, pollution, dirt and noise are all greatly reduced, thus improving work conditions.

The high production spray gun incorporates a double spray pattern regulator, product regulator and stainless steel nozzle and needle in the standard version.

Applications

- > For tasks requiring a high opening and closure rate. Ideal to be used with robots and special machinery.
- > Versions for highly corrosive or abrasive products (with tungsten carbide needle and nozzle).

- > For tasks where it is necessary to reduce mist and improve work conditions.
- > Achieves a drastic reduction in product consumption.

Application Sectors

Furniture Industry - Automotive Industry - Plastics - Ceramic - Textile - Tannery

TECHNICAL DETAILS

- > Spray pressure at aircap: 0.68 bar
- > Dimensions: 164 x 45 x 104 mm
- > Weight: 785 g
- > Air consumption: 500 - 600 L/min
- > ATEX II 2G x

INDUSTRIAL PAINTING

Automatic spray guns

V Series V6 EPA & V7 Mix

V6

Maximum finish quality with waterborne or solvent-based products

Maximum mist and product consumption reductions

Very low air consumption. Works at very low pressures

* See CODES on page 52

V7 Mix

High production, low pollution

Maximum speed of application

High paint pressure mix system (30-150 bar)

Low air pressure: 0.5 - 2 bar

* See CODES on page 52

EPA spray system with a minimum product transfer of 65%.

Savings of paint supply, reduction of mist.

Stainless steel nozzle and needle, product regulator, double fan regulator....

Applications

- > For tasks requiring a high opening and closure rate. Ideal to be used with robots and special machinery.
- > Versions for highly corrosive or abrasive products (with tungsten carbide needle and nozzle).
- > For tasks where it is necessary to reduce mist and improve work conditions.

- > Achieves a drastic reduction in product consumption.
- > For all applications where the very highest quality finish is required.

Application Sectors

Furniture Industry - Automotive Industry - Plastics Industry - Textiles - Stains

TECHNICAL DETAILS

- > Dimensions: 164 x 45 x 104 mm
- > Weight: 785 g
- > Air consumption: 380 L/min
- > ATEX  II 2G x

The SAGOLA V7 Mix is a high production low pollution spray gun. Tungsten carbide product closure mechanism.

Includes: product inlet filter, air inlet quick couplings, double fan regulator and cleaning and maintenance accessories.

Applications

- > For tasks requiring a high opening and closure rate. Ideal to be used with robots and special machinery.
- > For tasks where it is necessary to reduce mist and improve work conditions.
- > Achieves a drastic reduction in product consumption.

- > Spraying of clearcoats, UV paints, etc.

Application Sectors

Furniture Industry - Metal Industry - Plastic Industry

TECHNICAL DETAILS

- > Working pressure: 30/150 bar
- > Minimum operational pressure: 3.5 bar
- > Dimensions: 164 x 45 x 104 mm
- > Weight: 945 g.
- > Air consumption: 150 L/min
- > ATEX  II 2G x

**450 A HVLP,
4200 A EPA and 4041A**

450 A HVLP

Great product savings

High production version available

Application Sectors

Furniture Industry
Automotive Industry - Plastics Industry - Ceramics

HVLP automatic spray gun which complies with the strictest environmental norms and standards due to its 72% + transfer.

Constructed especially for automatic systems where a very high rate of open - close cycles is required.

It is also recommended where considerable spray mist reduction is required.

Durable: low maintenance costs.

Code	Version	Application
10210303	1.00 [500]	Liquid products, dyes and metallized products
10210304	1.20 [500]	Finishes, basecoats and primers. Metal and wood
10210307	1.20 [600]	High speed application
10210309	1.20 [3030]	Primers, basecoats
10210310	1.40 [3030]	Primers, high micronage, low mist

TECHNICAL DETAILS

- > Air consumption: 540 L/min. (500), 600 L/min. (600), 400 L/min. (3030)
- > Spray pressure at aircap: 0.68 bar
- > Operating pressure: min. 4 bar
- > Dimensions: 152 x 83 x 73 mm
- > Weight: 710 g
- > ATEX II 2G x

4200 A EPA

Lower air consumption than conventional spray guns

Application Sectors

Furniture Industry
Automotive Industry
Plastics Industry

The 4200A is an automatic high production EPA spray gun with a minimum transfer of 65%.

Stainless steel nozzle, needle and paint packing nut.

Extremely high finish quality.

Code	Version	Application
10250701	1.00 [380]	Highest quality finishes
10250702	1.20 [380]	Finishes, primers

TECHNICAL DETAILS

- > Air consumption: 380 L/min.
- > Operating pressure: min. 4 bar
- > Dimensions: 152 x 83 x 73 mm
- > Weight: 710 g
- > ATEX II 2G x

4041A

Special for finishes

Conventional spray gun ideal for robots and special machinery.

Special nozzles in tungsten carbide for abrasive products.

Application Sectors

Metal - Plastic - Automotive - Ceramics

Code	Version	Application
10210350	1.20 [765]	Extremely high finish quality

TECHNICAL DETAILS

- > Air consumption: 370 L/min
- > Dimensions: 152 x 83 x 73 mm
- > Weight: 710 g
- > ATEX II 2G x

INDUSTRIAL PAINTING

Automatic spray guns

Other versions

4041 Mix, V2 PD, 4098 and PSAA 108

4041 Mix

Maximum speed of application

Medium paint pressure (30-150 bar)

Minimum mist

Code

35230401

Compact and robust automatic mix system spray gun.

Tungsten Carbide closures.

Application Sectors

Furniture - Metal - Wood

TECHNICAL DETAILS

- > Air consumption: 150 L/min.
- > ATEX II 2G x

V2 PD

Maximum transfer

Nozzle 6 mm.

Road signs

Code

10259203

Special automatic spray gun for road signage painting machinery.

Internal mixing nozzle.

Valid for high viscosity products.

4098

Special for clears, ceramics and abrasives

Code

10250601

Version

1.40 [765]

Spray gun designed for the application of ceramic products and abrasive paints.

Product closure is accomplished using a membrane system. Due to its small size and weight it can be installed in places of restricted space.

TECHNICAL DETAILS

- > Dimensions: 70 x 90 x 110 mm
- > ATEX II 2G x

PSAA 108

Automatic airless spray gun

To use with all types of medium and high viscosity products

Code

30270101

Anodized aluminium body. Operation by means of pneumatic cylinder. Tungsten carbide closure.

TECHNICAL DETAILS

- > Maximum product pressure: 400 bar
- > 1/4" product inlet coupling
- > ATEX II 2G x

Industrial Air Filtration Systems

New challenges in painting (new waterborne paints), more tools in the industry and more demanding productivity constantly increase the importance of the **reliability of the compressed air network.**

The appearance of new regulations regarding the drastic reduction of solvents in the new paints means that the existence of impurities in the air system is more and more critical to the final result of satisfactory finishes.

With the sole **objective of achieving the maximum degree of finish** and gloss, we at SAGOLA have applied ourselves wholeheartedly to developing **our 5000X line of filters.**

We have endowed all the models (5000X and 5100X) with the latest purification and regulation technology and performance, offering the industry all the possible responses at the most important point: inside the spray painting booth.

Additionally, SAGOLA offers its **renewed PLUS range of filters, regulators and lubricators** with a new compact, robust design for efficiency and smooth handling, and the best price-quality ratio on the market.

 of stainless steel**

Silicone free joints

Code	Model	Version
10730305	5300X	US-Mil
10730351		Nitto
10730308		Euro-profile

Model 5300X offers the maximum filtration level in spray booths and painting lines with high quality air demand.

Ideal for waterborne paint and where organic fumes in the network are a problem.

Sinterised brass 8 micron pre-filtration is incorporated, followed by a 0.01 micron coalescent filter and final filtration by a wide surface active charcoal filter.

In addition to water and impurities, this process eliminates organic fumes and foul air.

TECHNICAL DETAILS

- > Air flow: 2,500 L/min
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance 90°C
- > Automatic + 2 semi-automatic drain systems

5200X

Code	Model	Version
10730304	5200X	US-Mil
10730350		Nitto
10730307		Euro-profile

Network pressure = 7 bar (101.53 psi)

Model 5200X offers the highest technology for air filtration. It incorporates an 8 micron sinterised brass filter, followed by a final 0.01 micron coalescent filter.

Other characteristics are the automatic drain system and the regulator with regulation wheel.

Its NEW VESSELS are tougher and more protective.

Its NEW DRAINING SYSTEM reduces maintenance costs due to its greater durability. It carries out double filtration with optimum flow and pressure regulation, retention of water and impurities attaining an air purity of 99%.

TECHNICAL DETAILS

- > Air flow: 2,500 L/min
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP (USMil couplings)
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance 90°C
- > Automatic + semi-automatic drain system

5100X & 5000X filters

5100X

Valid for HS paints and highest quality finishes

Regulator filter with new vessel

Minimum pressure loss

Double outlet

Code	Model	Version
10730202	5100X	US-Mil
10730208		Nitto
10730206		Euro-profile

Air purifying filter with pressure regulator and pressure gauge.

Its NEW VESSEL is tougher and more protective.

Model 5100X comes with a NEW DRAINING SYSTEM which reduces maintenance costs due to its greater durability.

It incorporates an 8 micron sinterised brass filter.

Air-assisted regulator. Wide surface filtration elements. Maximum manufacturing quality in materials and machining

Special for waterborne and HS paints

Extremely smooth action. Maximum precision.

Maximum quality in air filtration.

Push connectors with stainless steel mechanisms and silicone-free gaskets. Automatic-draining system and air assisted regulator.

TECHNICAL DETAILS

- > Air flow: 2,500 L/min.
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance: 90°C

5000X

Valid for highest quality finishes

Code	Model	Version
10730204	5000X	US-Mil
10730207		Nitto
10730205		Euro-profile

Air purifying filter with pressure regulator and pressure gauge.

Its NEW VESSEL is tougher and more protective.

The 5000X model incorporates a semi-automatic draining system.

TECHNICAL DETAILS

- > Air flow: 2,500 L/min.
- > Air inlet: 1/2" BSP
- > Air outlet: 1/4" BSP
- > Maximum working pressure: 12 bar
- > Maximum temperature resistance: 90°C

- > Dimensions 4220 PLUS: 279 x 117 x 186 mm.
- > Weight: 4220: 1,797 g. 4220 PLUS: 2,002 g.
- > Brass filter: 20 microns + Coalescent filter: 0.01 microns
- > Drain system: automatic + semi automatic
- > Air flow: 1,700 l/min.
- > Maximum pressure: 12 bar
- > Air inlet: 1/2"
- > Coupling 4220 PLUS: SAGOLA US Mil

**479 Plus, 970 Plus, 430 Plus,
439 Plus and 437 Plus**

**479
PLUS**

The most compact solution for the small workshops, industry or priming and preparation areas

Code	Version
10730401	1/2"
10730402	3/8"
10730403	1/4"

TECHNICAL DETAILS

- > Dimensions: 229 x 73 x 115 mm
- > Weight: 886 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar
- > Draining system: semi-automatic

Large air flow, highly reliable regulating system, high quality pressure gauge, the best materials. Adaptable to any size of hose. Great filtration capacity with check window for waste particle and semi-automatic drain system.

**970
PLUS**

Assure the supply of clean and properly lubricated air to tools and pneumatic engines

Code	Version
10750301	1/2"
10750302	3/8"
10750303	1/4"

TECHNICAL DETAILS

- > Dimensions: 229 x 148 x 115 mm
- > Weight: 1,450 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Connections: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar
- > Draining system: semi-automatic

It supplies clean, lubricated air to all your tools. Accurate control of the oil content by means of a "drop-by-drop" hand regulator.

**430
PLUS**

Small, sturdy, reliable and long lasting

Code	Version
10740501	1/2"
10740502	3/8"
10740503	1/4"

Mini air regulator. Diaphragm regulator from 0 to 10 bar.

TECHNICAL DETAILS

- > Dimensions: 107 x 65 x 115 mm
- > Weight: 544 g
- > Air flow: 1,200 - 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar

**439
PLUS**

High durability, maximum robustness

Code	Version
10720401	1/2"
10720402	3/8"
10720403	1/4"

High flow filter for insertion in air lines. Check window for waste liquids. Semi-automatic drain system.

Suitable for all type of installations, accessories included.

TECHNICAL DETAILS

- > Dimensions: 158 x 73 x 73 mm
- > Weight: 553 g
- > Brass filter: 40 microns
- > Air flow: 1,700 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar
- > Draining system: semi-automatic

**437
PLUS**

Minimum flow restrictions

Code	Version
10710301	1/2"
10710302	3/8"
10710303	1/4"

Ideal for the proper lubrication of pneumatic tools. Manual oil regulator by level check window, drop by drop system. CNC mechanized from a solid aluminium block.

TECHNICAL DETAILS

- > Dimensions: 165 x 73 x 73 mm
- > Weight: 482 g
- > Oil filter
- > Air flow: 1,920 L/min
- > Couplings: 1/2", 3/8", 1/4"
- > Max. working pressure: 10 bar

Compressed air hoses Compressed air complements

- > **Wide range of push connectors and plugs:**
 - US MIL, EURO PROFILE, MULTI PROFILE and NITTO
 - High quality, safety, anti-shock....
 - > **Air and Paint Hoses**
 - > **High and low pressure hoses**
 - > For mix, airless and aerographic spray guns

SAGOLA invests the maximum care in this range because we know that you can not take risks with pressure equipment.

General application spray guns

A wide range of **pneumatic tools** as a **complement to the paint line** in industrial workshops:

- > **Blowers and Sealants.**
- > Guns for **adhesives bead** application and textured products.

Sanding system

Low air consumption pneumatic rotary orbital sanders.

- > Work with the maximum cleanliness, assuring that all the sanding dust is properly collected.

Personal Protection

Protective masks for sanding and painting processes, anti-static painters' overalls...

One of SAGOLA's main concerns is to assure optimum, safe working conditions for all.

Waste Management System

Why increase waste disposal costs of paint cans, paper and cardboard because you can not reduce their volume?

We at SAGOLA understand the importance of proper management of the residues generated by paints and solvents in industry and the high costs these imply in the running of a business. In this section we offer two important product lines to drastically reduce these costs.

- > **Can, paper and cardboard crushers**
 - Robust
 - Safe and easy to use

FEATURES
NEW RANGE

Couplings and connectors

Max. pressure: 25 bar
Europerfil max. pressure: 15 bar
Aluminum plugs max. pressure: 20 bar

The new range of plugs SAGOLA presents cutting-edge design. SAGOLA offers a wide range that gives cover 100% of market requirements. Is incorporated security versions. All steel and aluminum plugs are BSP; Males (BSPT) and females (BSPP).

Plug body made of treated steel and valve made of brass. So a guaranteed life of more than 1,500,000 uses. The new range of plugs SAGOLA incorporates a handle made of composite, which gives a high resistance to both attrition and drag. Attrition resistance tested in more than 48,000 impacts and the equivalent to a crawl 12 km.

1. SHOOTER made of composite with a weight reduction and extraordinary durability against impact (48,000 impacts test).

2. BODY PLUG made of steel with anticorrosive treatment.

3. VALVES Brass valve manufactured, specific to work at high temperatures.

4. JOINTS Nitrile Butadiene. Operating temperature range: -20°C +100°C.

5. PINS made of tempered high strength steel that guarantees the absence of attrition.

6. SPRING made of stainless steel.

The quick couplings are supplied in individual blister packs

Ultra-Light range. Ultra-light weight. 45 g.

518 Pro and 416

**518
 PRO**

Code

10330301

Total regulation on product flow and spray size

Operating pressure

Pressurized pneumatic gun for antigravel cartridges and underbody protection.

Total regulation on product flow and quality of atomization and spray size. Air inflow regulator. Operating pressure. The cartridge container is made in anodized aluminum. It is light and sturdy. Needle regulator to control precisely the texturing. Very accurate depressurizing valve. It is easy to handle even with gloves.

Special air cap for cavity wax, that includes two types of dispensers. (OPTIONAL). Stainless steel silencer.

The 518 Pro works with low pressure and offers the maximum regulation options and productivity.

TECHNICAL DETAILS

- > Empty weight: 1,369 g
- > Connection: 1/4" male coupling
- > Air consumption: 120 L/min at 3.5 bar air pressure
- > Working pressure: 2 bar - 4 bar
- > Maximum pressure: 10 bar

1/4" Standard Connection

The new 3900 Plus pneumatic sealers are a compact, efficient and light solution for everyday needs in any workshop. These pneumatic guns are very useful when it comes to structure assembling, repairs and windshield set-ups, amongst others.

There are two versions: the 3900 Plus for sealants in cartridges and the 3900 Plus M for sealants in sausages. Both versions include a trigger with discharge valve, which guarantees a great precision and control.

The metallic internal parts assure a long working life. Besides, those parts do not require any manipulation neither any maintenance.

Its body is made of high resistance aluminum. The front part on the 3900 Plus is made of non-deformable plastic.

The 3900 Plus sealers are a very strong product capable to work for long working hours.

"L" range sanders

"L" range sanders have been designed for workshops where high performance and top quality finishes are demanded. If you are looking for scratch-free quality, you can trust the "L" range. Due to the lubricant-free design, there is no concern about substrate contamination.

0.2 HP motor, 12,000 r.p.m.

The **L505** is a pneumatic orbital sander with a 5 mm. oscillation designed for quick grinding down, with a good quality surface finish.

The **L252** is a pneumatic orbital sander with an oscillation of 2.5 mm. which ensures high quality finishes without leaving any kind of marks on the surface.

TECHNICAL DETAILS

- > Plate size: 152 mm./6 inch
- > Oscilation L505: 5 mm. L252: 2.5 mm.

Antistatic Coverall

Air ventilation system

Breathable

Water repellent and dirt-resistant

Code	Size	EU size
40000523	XS	38/40
40000524	S	42/44
40000525	M	46/48
40000526	L	50/52
40000527	XL	54/56
40000528	2XL	58/60
40000529	3XL	62/64

Breathable panel in the back and underarms.

Adjustable hood with elastic band and velcro. Press-buttons neck closure. Elastic ankle and wrist.

2-way zip and flap fitted with 2 breast pockets, 1 inside pocket, 2 side pockets and a hip pocket.

Original Dupont Teflon coating (water repellent and dirt-resistant).

Silicone and lint free.

TECHNICAL DETAILS

> Material: 98% polyester, 2% carbon

> Standard EN1149: 1 Permanent antistatic

> PPE CAT. I

> Washable at 30°C or by chemical cleaning

Can and carton crusher

Can Crusher

Simple, versatile and efficient

Code

40000314

Meets European Directive 98/37/CEE of 22 January 1998.

Significant space saving and cost reduction in waste management.

Designed to solve residue storage and disposal problems in places like bodyshops, industrial workshops, garages, etc.

Can Crusher

Greater load. Valid for cylindrical recipients up to 25 L (maximum height 45 cm. and 31 cm. diameter).

TECHNICAL DETAILS

- > Dimensions: 510 x 540 x 1,460 mm
- > Working pressure: 8 bar
- > Power: above 1,700 Kg
- > Pneumatic safety system
- > Total weight: 185 Kg

Can and carton crusher

Functional and complete

Code

40000315

Meets European Directive 98/37/CEE of 22 January 1998.

Significant space saving and cost reduction in waste management.

Designed to solve residue storage and disposal problems in places like bodyshops, industrial workshops, garages, etc.

Two accesses:

- > Upper: loads cardboard and paper.
- > Lower: unloads cardboard, loads cans.

Reel of string at rear to tie the crushed bundles of paper and cardboard.

TECHNICAL DETAILS

- > Dimensions: 560 x 750 x 1,750 mm
- > Working pressure: 8 - 9 bar
- > Pneumatic safety system
- > Total weight: 225 Kg

Industrial and construction application guides, aircaps, nozzles and spray gun and pump accessories

Service, a key word in SAGOLA's
strategic approach to bodyshop.

One of our main concerns is to make the painter
be able to quickly identify and acquire the main
SAGOLA original spare parts - nozzles, needles,
aircaps, racks, deposits, regulators...

In this section we offer our application guides
and our main complements.

Extensions for spray guns

Extension for X 4100 series

Versions extension for X 4100 series spray gun.
150, 300 and 500 mm. extensions for a variety of needles.

Code	Description
52411737	Extension 150 mm. 1.00 - X 4100 series
52411738	Extension 150 mm. 1.20 - X 4100 series
52411733	Extension 150 mm. 1.40 - X 4100 series
52411740	Extension 300 mm. 1.00 - X 4100 series
52411741	Extension 300 mm. 1.20 - X 4100 series
52411742	Extension 300 mm. 1.40 - X 4100 series
52411743	Extension 500 mm. 1.20 - X 4100 series
52411744	Extension 500 mm. 1.80 - X 4100 series

Extension 150 mm.

Extension 300 mm.

Extension 500 mm.

Extension for MiniXtreme

Versions extension for Mini Xtreme spray gun.
150 and 300 mm. extensions for a variety of needles.

Code	Description
52411713	Extension 150 mm. 0.80 MiniXtreme
52411714	Extension 150 mm. 1.00 MiniXtreme
52411715	Extension 150 mm. 1.20 MiniXtreme
52411716	Extension 150 mm. 1.40 MiniXtreme
52411717	Extension 300 mm. 0.80 MiniXtreme
52411718	Extension 300 mm. 1.00 MiniXtreme
52411719	Extension 300 mm. 1.20 MiniXtreme
52411720	Extension 300 mm. 1.40 MiniXtreme

Extension 150 mm.

Extension 300 mm.

Extension for Mini V

Versions extension for Mini V automatic spray gun.
300 mm. extensions for a variety of needles.

Code	Description
52411730	Extension 300 mm. 1.20 Mini V
52411731	Extension 300 mm. 1.30 Mini V

Extension 300 mm.

Lateral jet aircap

Mini V series

Code

56411117

Lateral jet aircap

X 4100 series

Code

56418621

Spray Gun Accessories

Air flow regulators

Code
56418020

Flow regulator with pressure gauge RC1

Aluminium, very light. Ideal for high transfer HVLP and EPA spray guns
Red-to-green pressure scale (green within provisions of regulations).
Assembled in seconds with hermetic hand tightening.

Code
56418519

High precision flow regulator

High precision air-flow regulator kit.
Solvent-proof gaskets. Suitable for 4600 Xtreme digital.
Recommended for finishing spray guns.

Code
40000335

Flow regulator RC2

Pressure gauge flow regulator.
Exact input pressure gun.
High quality gauge green scale for high transfer guns.

Ford 4 viscosimeter

Code
56418001

Magnetic Stands SP1 and SP2
Magnetic stand for 1 (SP1) or 2 (SP2) spray guns. Solvent-proof paint. Supports PPS type adapters. Maximum robustness. High holding power due to two powerful magnets.

Code	Version
40000245	SP1
40000246	SP2

Gravity spray gun Pressurizer kit

for gravity spray guns. Gravity cup pressure kit for high viscosity materials spraying. Non-return valve included.

Code
56418513

Accessories for cleaning and maintenance

Cleaning kit

Complete cleaning set, including one brush for outside cleaning, and rods of different sizes for all the inner paths of the spray gun. Supplied in a practical show case.

Code
40000086

Lubricant grease

Natural grease, specially made for spray guns and painting equipments moving parts lubrication. High consistency, even under extreme temperatures. Long lasting, it doesn't lose properties over the time. Easy to open 100 ml. can.

Code
56418589

Gravity deposits

High quality deposits for gravity spray guns.

Code	Description	Spray Gun Range
56418432	0.65 L Gravity Deposit Kit	4600 Xtreme / 4500 Xtreme

56418703	Close Gasket Replacement Kit	518 PRO

The **aircap model** is vital to achieve the desired results. The type of product we are going to apply and the application system we are going to use must both be taken into account when selecting an aircap. Correctly combining the aircap with the adequate nozzle and needle kit, the desired spray quality will be obtained.

High transfer aircaps

Code	Aircap	Spray gun range	Transfer System	Application	Nozzle+ Needle mm.	Air consumption L/min. (2 bar)	Flow g/min.	Fan size mm.
56418565	XT01	X 4100 Series GRAVITY/SUCTION	EPA 65% Transfer	Maximum performance, Clearcoats, Basecoats and metallized	1.3 - 1.8	315	175	305
